Cost Index &
Depreciation Schedules

North Carolina Department of Revenue
Local Government Division
Property Tax Section

Following this introduction is the 2019 Cost Index and Depreciation Schedules for use in valuation of business personal property located in North Carolina. One of the most effective and efficient methods for determining current Replacement Cost New Less Depreciation is the use of these valuation tables. These tables are published by the Property Tax Section solely to assist the business personal property appraiser in determining current market value.

All life years used on the different types of property have been carefully researched with federal tax guides, other state government depreciation schedules, as well as information provided to us by the taxpayers themselves. The trend factors are determined using the percentage price increase or decrease over the past year of similar business markets. These percentages come from the latest edition of Producer Price Indexes, as determined by the U.S. Department of Labor, Bureau of Labor Statistics.

In using these trending schedules, you will be utilizing the cost approach to value. In using the cost approach, the appraiser must determine four critical elements:

1. The original (historical) installed cost
2. The current replacement cost new (RCN)
3. The useful economic life of the property
4. The loss in value (Depreciation)

When applying the schedules, always use original (historical) cost which includes all costs involved with bringing the property into operation. As an example, consider the following:

On their 2019 business listing, a manufacturer of machinery listed \$10,000 in machinery and equipment, acquired in 2012. This amount correctly included \$8,000 actual equipment, \$1,500 installation, and \$500 freight and taxes. Using schedule A, with a suggested useful life of 10 years, we note that the appraised market value as of January 1, 2019 would be:

$$\$10,000 \times .33 = \$3,300$$

In examining what we have done, the trending factor of 1.10 brings the value of the equipment up to current replacement cost new, which would be:

$$\$10,000 \times 1.10 = \$11,000$$

Then we depreciate RCN assuming the property is seven years old with a suggested ten-year life and therefore has three years remaining in its useful economic life:

$$\$11,000 \times .30 = \$3,300, \text{ is the same answer as above.}$$

The valuation tables show percent good factors (.33) which are simply the products of the trending factors (1.10) and the straight-line depreciation factors (.30). These percent good factors are used to find current replacement cost new less depreciation. It is **very important** to remember that in using the trending schedules, you do not apply the trend factor a second time as it has already been used in the calculation of the percent good factor.

<u>COTTON GINS AND COMPRESSES</u>	16	A	12
Cotton gin machinery for removing seeds from raw cotton. Cotton compresses are machines used to bale cotton after ginning.			
<u>* DATA PROCESSING EQUIPMENT</u>	27	U	5
This category is for non-production computers. It includes personal computers, taxable software, smartboards , midrange and mainframe computers, and their peripherals used for data processing. Includes standard IBM compatible personal computers used in manufacturing and point of sale (POS) systems, but not proprietary POS units, such as computers built specifically to be used as POS computers or other proprietary computerized systems. For POS proprietary systems and electronic cash registers, see <i>Store Equipment</i> .			
This category <u>does not</u> include computers embedded in machinery, nor does it include equipment or computers specifically designed for use in any other application directly related to manufacturing or retail. It does not include equipment that is an integral part of other capital equipment that is included in other classes of economic activity, such as computers used primarily for process or production control, switching, channeling, and automating distributive trades and services, such as proprietary POS computer systems.			
This category <u>does not</u> include equipment of a kind used primarily for the amusement or entertainment of the user.			
<u>Note:</u> Accelerated depreciation is used on data processing equipment. The residual is 5%.

Includes the manufacture of fabricated metal products such as cans, tin ware, hardware, metal structural products, architectural and ornamental metalwork, nuts, bolts, metal awnings, portable metal structures, etc.			
<u>* FARM AND RANCH MACHINERY AND EQUIPMENT</u> ..	16	A	10
Includes all farm implements, machinery and equipment used in the production of crops and animals, on the farm processing of feeds, poultry and swine house equipment, tractors, combines, and cotton harvesters.			
 Note: Whenever possible, this equipment should be appraised using the market (sales comparison) approach. There are several good pricing guides available which provide market values of farm equipment based on sales. If the county appraises farm equipment using the cost approach, the A-10 schedule with a 25% residual is statutorily required for <u>all</u> equipment in this category!			
<u>FIBER OPTICS MANUFACTURING</u>	20	I	8
Manufacturers of glass fiber for fiber optics.

<u>HOTEL, MOTEL AND RESORT EQUIPMENT</u>	19	D	10
Televisions	17	B	5
<u>LANDSCAPING EQUIPMENT</u>	16	A	8
<u>IDLE EQUIPMENT</u>			
Equipment that has been taken off production status on a permanent basis is considered to be idle equipment. This classification should not be confused with equipment that is temporarily idle due to not yet being placed into production (CIP), a downturn in the economy, seasonal production, routine maintenance, etc. Although we recommend in most cases that some additional depreciation adjustment be made to verified idle equipment, there is no firm guideline as to what adjustment should be made to determine the final value.			
In determining the amount of adjustment, the county appraiser must review each situation, taking into account all the factors affecting the property such as age, condition, past and future uses, marketability, remaining life, and reasons for the equipment being idle.			
<u>INSTRUMENTS (PROFESSIONAL, SCIENTIFIC & CONTROLLING, PHOTOGRAPHIC AND OPTICAL, WATCHES AND CLOCKS).</u>	17	B	12
