## Instructions

Purpose of Form. - If your income varied during the year because, for example, you operated your business on a seasonal basis, you may be able to lower or eliminate the amount of your required installment for the due dates by using the annualized income installment method. Use Form D-422A, Annualized Income Installment Worksheet, to figure the amounts to enter on line 16 of Form D-422, Underpayment of Estimated Tax by Individuals. Also enter the letter A in the box by line 22b of Form D-400.

If you use the Annualized Income Installment Worksheet for any payment due date, you must use it for all payment due dates. To arrive at the amount of each required installment, the worksheet automatically selects the smaller of the annualized income installment or the regular installment
(increased by the amount saved by using the annualized income installment method in figuring earlier installments). If you use the annualized income installment method, you must enter the amount from line 25 of the worksheet in each column of line 16 of Form D-422 and check the box on that line.

Important Information for Nonresidents and Part-Year Residents: Nonresidents and part-year residents should complete only the column(s) for the period(s) in which they had income from North Carolina sources. For example, if the income from North Carolina sources was received in November only, complete only the last column. In addition, nonresidents and part-year residents must multiply any amount(s) on line 15 by the decimal amount shown on line 12 of Form D-400 before determining the tax on line 16.
