[Collections for any given period may reflect multiple State general rates. The *Computed State sales and use tax collections per 1 cent of tax* amounts computed for 1991-92 and 2001-02 have been adjusted to account for the timing of rate change implementation. Tax collections generated from rates less than the general rate (preferential rates) and rates greater than the general rate (6% telecommunications services, 6% spirituous liquor, and 5% direct-to-home satellite) are not included in the computations of collections per 1 cent of tax. Collections do not include state retained portions of local sales and use tax collections or refunds of local sales taxes to state agencies. Major legislative changes affecting the tax base subject to the *general rate* and food purchased for home consumption are noted below.]

State general rate:

The State general rate increased from 3% to 4% effective for sales made on or after July 16, 1991. The State general rate increased from 4% to 4.5% effective for sales made on or after October 16, 2001 and is scheduled to revert to 4% effective July 1, 2007.

State rate applicable to food purchased for home consumption:

Effective January 1, 1997, the State rate applicable to food purchased for home consumption was reduced from the State general rate of 4% to 3%.

Effective July 1, 1998, the State rate applicable to food purchased for home consumption was reduced from 3% to 2%.

Effective May 1, 1999, the 2% State rate applicable to food purchased for home consumption was repealed.

[Column 1 includes all collections of State sales and use taxes generated from food purchased for home consumption. For fiscal years 1996-97 through 1998-99, collections of food purchased for home consumption generated from the 3% or 2% rate are not included in columns 2 and 4 because the applicable rate was less than the State general rate.]
