8. A retailer or facilitator required to collect county tax should do so based on the sourcing provisions in N.C. Gen. Stat. § 105-164.4B.

The following general principles apply in determining where to source the sale of most items for the retailer or facilitator's purpose and do not alter the application of the use tax imposed on the purchaser. These principles should be used to determine the applicable local and transit rates of tax due on a retail sale. Except as otherwise provided, a service is sourced where the purchaser can potentially first make use of the service.

- (a) When a purchaser receives an item at a business location of the seller, the sale is sourced to that business location.
- (b) When a purchaser or purchaser's donee receives an item at a location specified by the purchaser and the location is not a business location of the seller, the sale is sourced to the location where the purchaser or the purchaser's donee receives the item.
- (c) When (a) and (b) of this section do not apply, the sale is sourced to the location indicated by an address for the purchaser that is available from the business records of the seller that are maintained in the ordinary course of the seller's business when use of this address does not constitute bad faith.
- (d) When (a), (b), and (c) of this section do not apply, the sale is sourced to the location indicated by an address for the

purchaser obtained during the consummation of the sale, including the address of a purchaser's payment instrument, if no other address is available, when use of this address does not constitute bad faith.

(e) When (a), (b), (c), and (d) of this section do not apply, including the circumstance in which the seller is without sufficient information to apply the rules, the location will be determined based on the following:

- Address from which tangible personal property was shipped,
- Address from which the certain digital good or the computer software delivered electronically was first available for transmission by the seller, or
- Address from which the service was provided.

The following are exceptions to the general sourcing rules:

- Florist wire sale - sourced to the business location of the florist that takes an order for the sale.
- Periodic rental payments - sourced in accordance with N.C. Gen. Stat. § 105-164.4B(b).
- Certain digital property - sourced to the location where the purchaser takes possession of the property or makes first use of the property, whichever comes first.
- Admission charge to an entertainment activity - sourced to the location where admission to the entertainment activity may be gained by a person. If the location where admission may be gained is not known at the time of the receipt of the gross receipts for an admission charge, the general sourcing principles apply.
- Direct mail - sourced in accordance with N.C. Gen. Stat. § 105-164.4E.
- Service Contract - If the purchaser can potentially make first use of the service at the location of the sale, the sale is sourced to the location of the sale of the service contract. If the purchaser of the service contract cannot potentially make first use at the location where the service contract is sold, the sale is sourced in accordance with N.C. Gen. Stat. § 105-164.4B(a)(3), (4) or (5) based on the hierarchy and available address.
- Prepaid meal plans - sourced to the location where the food or prepared food is available to be consumed by the person.
- Rental of an accommodation - sourced to the location of the accommodation.
- Renewal of a Service Contract for prewritten software - Normally, sourced in accordance with the general sourcing principals. However, sourcing to the location where the purchaser received the underlying prewritten software does not constitute bad faith provided the retailer has not receive dinformation from the purchaser that indicated a change in location of the underlying software.
